SKILLS

JavaScript, Python, React, Redux, HTML, CSS, Flask, Node.js, Express, PostgreSQL, SQLAlchemy, Sequelize, Git

PROJECTS

Getaway (Python, JavaScript, React, Redux, CSS3, PostgreSQL, Flask, Docker)

[Live Site](#) | [Github](#)

Inspired by Airbnb, a web app that allows users to post rental listings in Brazil and users can leave a review.

- Implemented React/Redux to dynamically render listings and reviews that allow users to interact intuitively with the website's information.
- Guaranteed user privacy through frontend and backend authentications with WTForms validators which allows users to only edit their own listings and reviews when logged in.
- Integrated Python backend with Flask and PostgreSQL for scalable data management and efficient queries through SQLAlchemy.

Petsy (Python, JavaScript, React, Redux, CSS3, PostgreSQL, Flask, Docker)

[Live Site](#) | [Github](#)

Petsy, a full stack clone of Etsy, is an online marketplace where people sell, buy, and collect unique pet items.

- Collaborated with a remarkable team of three engineers to build a complete marketplace website, coordinated with teammates to maximize efficiency to complete MVP features through stand up meetings and git workflow.
- Built an interactive grocery cart using React/Redux that allows users to dynamically add and edit their cart based on item quantity and preferences while utilizing Local Storage for persistence of data.
- Ensured user privacy through frontend and backend authentication measures, allowing users to access only their own data features when credentials are met.

Estadium (JavaScript, React, Redux, CSS3, PostgreSQL, Express)

[Live Site](#) | [Github](#)

Estadium, inspired by Flickr, a photo sharing app where soccer fans post and comment on soccer related experiences.

- Integrated Redux to create a single page app by saving states throughout a user's session to dynamically render React components allowing for efficient and dynamic post and comment editing and deletion.
- Utilized Bcrypt to hash user passwords before storing them in the database to ensure user privacy and created user authorization routes to restrict access
- Utilized AWS S3 cloud storage to allow user image uploads and deletion facilitating scalability, security and low-latency data storage from the cloud.

EXPERIENCE

Bay Junk - Financial Analyst

May 2018 - Sep 2020

- Improved overall financial reporting by redesigning control processes and reporting structures which increased efficiency and organization.
- Analyzed incoming and outgoing reports daily to ensure accuracy.
- Collected data and developed detailed spreadsheets to identify trends, create revenue, profitability and expense forecasts.

EDUCATION

App Academy

Curriculum of Study in Web Development (JavaScript and Python)

San Francisco State University

Bachelor of Science in Business Administration (Concentration: Finance)

Cañada College

Associate's Degree in Business Administration

San Francisco, California

October 2021 – April 2022

San Francisco, California

Class of 2018

Redwood City, California

Class of 2013
